

## Kosciusko REMC

Dear Member:

Thank you for requesting information about interconnecting distributed generation (DG) to Kosciusko REMC's electric system. To assist our members, we have developed a packet of materials designed to assist you in navigating the complex process from project conception to completion.

As an electric cooperative we are concerned with protecting the safety of cooperative personnel and members, maintaining the integrity and reliability of the electric grid and ensuring rate equity for all members. Because DG can affect the safety and reliability of the distribution system, we have developed an "Interconnection Requirements" document that addresses those issues. These requirements ensure that we can continue to provide you and all other members with safe and reliable electric service.

In this packet you will find the following materials:

- Interconnection Overview
- Application for Interconnection
- Interconnection Requirements
- DG Rate Schedule
- Sample Legal Agreement for Interconnection
- Frequently Asked Questions
- "Get the Facts Before Buying Into Wind Power"
- Kosciusko County Windmill Regulations
- Resources

Please feel free to contact our engineering department at 574-267-6331 or [engineering@kremc.com](mailto:engineering@kremc.com) if you have any questions.

Sincerely,

Kosciusko REMC
